ECONOMIC ABSTRACT OF ALABAMA 1984

Center for Business and Economic Research
The University of Alabama
University, Alabama 35486

Printed Series No. 49

ISBN 0-943394-02-3

Supported in part by grants from:
Department of Economic and Community Affairs
Economic Development Administration
Project Number 04-25-01358-60
and
The Alabama Public Library Service

Reproduction of this document in whole or in part by a user is permitted, provided proper citation of author(s), title, publisher, and date is given.

This is one of several efforts being undertaken as a part of the State Information Planning Program to provide information and assistance to the State of Alabama and its local units of government.

The printing of this report was financed in part through a 302(a) grant from the Economic Development Administration, U.S. Department of Commerce, administered by the State Planning Division of the Department of Economic and Community Affairs, Office of the Governor.

INDEX 425

Sections and Tables

1. AGRICULTURE 1

1-1. Realized Gross Income and Net Income From Farming in Alabama, 1949-1981 2

1-2. Cash Receipts from Farm Marketings in Alabama Counties, 1980, 1981, and 1982 3

1-3. Peanut Acreage, Yield, Production, and Value in Alabama Counties, 1979, 1980, 1981, and 1982 4

1-4. Soybean Acreage, Yield, and Production in Alabama Counties, 1980, 1981, and 1982 5

1-5. Corn Acreage, Yield, and Production in Alabama Counties, 1980, 1981, and 1982 6

1-6. Cotton Acreage, Yield, and Production in Alabama Counties, 1980, 1981, and 1982 7

1-7. Farms, Land in Farms, Land Use, and Value of Land and Buildings in Alabama Counties, 1978 8

1-8. Value of Agricultural Products Sold and Other Farm Related Income, 1974 and 1978 9

2. BANKING AND GOVERNMENTAL FINANCE 11

2-1. Major Sources of Alabama Revenue Receipts, Fiscal Years 1960, 1965, 1970, 1975, and 1978-1982 12

2-2. Alabama Sales Tax Collections by County, Fiscal Years 1977-1982 13

2-3. Alabama Use Tax Collections by County, Fiscal Years 1977-1982 14

FOREWORD

While the purpose of the Economic Abstract of Alabama--that it serve as a basic reference for planners, researchers, and others who need statistical information about Alabama and its people--has not changed over the years, many changes have taken place within the document in an attempt to meet the changing needs of the reader. This is the philosophy behind the 1984 edition of the Abstract.

Major differences between this edition and the 1982 edition include the following:

--Portions of several sections were consolidated into a new transportation section. Several tables previously not included in the Abstract were added to this section;

--Retail trade, wholesale trade, and service industries sections were consolidated into a single trade section;

--All sections were rearranged alphabetically.

But the most noticable change in this edition over all previous editions is the method of binding. The loose-leaf format was chosen because it allows for more frequent updates while reducing costs to the user. This method of binding also is more convenient and more durable than a perfect-bound book.

Please let us know how the loose-leaf presentation of the Abstract works for you. And if you find discrepancies in the data or have suggestions for improvements in content of future editions, please submit these comments as well.

Steve Fowler
Annette Watters
Editors
Economic Abstract of Alabama

ACKNOWLEDGMENTS

The compilation of such a volume as this depends heavily upon the efforts of all the staff of the Center for Business and Economic Research. I want to gratefully acknowledge those efforts as well as to recognize members of the CBER staff for their specific contributions.

Virtually every page of this volume required the attention of someone at a typewriter or a word processor. The large data tables had to be set up, updated, and corrected--in some respects the most difficult job associated with this publication. Our thanks for this fine work go to Sandy Cromer, word processing supervisor, and to her predecessor, Marsha Baines, as well as to Martha Shirley and Lynda Orr on the word processing staff.

Members of the professional staff who prepared sections for this volume include Edward P. Rutledge, Associate Director; and Deborah Hamilton, Annette Watters, and Steve Fowler, Research Associates. Dr. David Cheng and Taylor E. Little, Jr., contributed to the gross state product section through the Alabama Econometric Model. Carolyn Trent, Darren Evans-Young and Carroll Greenhill provided programming support. Additional administrative support was provided by Judy Burchfield, Linda Davidson, and Kathryn Rivers.

A special thanks go also to the University of Alabama students who contributed technical assistance and many hours of proofreading to insure the accuracy of the tables. Various state agencies supported the work by providing special tabulations; these are acknowledged in the footnotes of the tables.

Carl E. Ferguson, Jr.
Director

1. AGRICULTURE

SECTION 1

AGRICULTURE

Since the resources for agricultural data are too numerous to list in this publication, only a few of the major ones will be mentioned.

Two of the major governmental organizations involved in the collection and dissemination of information on agriculture are the U.S. Department of Commerce and the U.S. Department of Agriculture. Through the cooperation of these two departments, a census of agriculture is taken every five years, the most recent one covering 1982. County level data are generally comparable; however, improvements in coverage in each subsequent census should be taken into consideration when comparing farm counts. These censuses are the most comprehensive source of detailed agricultural statistics. Data from the 1982 census were not yet available at the time of this writing.

For current information on an annual and monthly basis the Department of Agriculture is the most widely used resource. Innumerable regular and special reports on every product and phase of agriculture are available directly from the Agriculture Department or cooperating agencies located in every state. The agency in Alabama is the Alabama Department of Agriculture and Industries.

One of the divisions of the Alabama department that collects and publishes current statistical data relating to agriculture is the Crop and Livestock Reporting Service. This service is responsible for many valuable annual, monthly, and periodic releases to the users of agricultural information.

Several other state resources are the Alabama Cooperative Extension Service, State Forestry Commission, and School of Agriculture at Auburn University.

TABLE 1-1. REALIZED GROSS INCOME AND NET INCOME FROM FARMING IN ALABAMA, 1949-1981
(In millions of dollars)

Year	Realized gross farm income: Cash receipts from farm marketings	Realized gross farm income: Government payments	Realized gross farm income: Non-money income	Realized gross farm income: Other farm income	Realized gross farm income: Total	Farm production expenses	Realized net farm income*	Net change in farm inventories	Total net farm income*
1949	351.5	5.5	133.1	-	490.1	266.9	263.2	-8.1	255.0
1950	359.7	8.1	126.8	0.1	494.7	239.3	255.3	10.4	265.7

2. BANKING
& GOV. FINANCE

SECTION 2

BANKING AND GOVERNMENTAL FINANCE

Banking and finance statistics are available from many federal and state agencies as well as from individual banks, associations, and organizations. Some of the major federal government agencies that collect and disseminate these data are as follows:

1) the Federal Reserve System, Board of Governors;

2) Federal Deposit Insurance Corporation (FDIC);

3) National Credit Union Administration (NCUA);

4) U.S. Department of the Treasury, Office of the Comptroller of the Currency;

5) Federal Savings and Loan Insurance Corporation (FSLIC); and

6) Federal Home Loan Bank Board.

The Bureau of the Census publishes several regular reports dealing with governmental finance. Among them are:

1. Census of Governments (quinquennial in years ending in 2 and 7)
    - A. Volume 2 - Taxable Property Values and Assessment - Sales Price Ratios.

      Provides numbers of properties and nominal and effective tax rates for counties and individual governments.
    - B. Volume 4 - Government Finances.
2. Current Government Reports (monthly or quarterly)
    1. Series GE - Government Employment
    2. Series GF - Government Finance Reports
    3. Series GR - Finances of Selected Public Employee Retirement Systems
    4. Series GT - Quarterly Summary of State and Local Tax Revenue

3. CONSTRUCTION & HOUSING

SECTION 3

CONSTRUCTION AND HOUSING

Primarily, construction statistics come from the U.S. Department of Commerce, Bureau of the Census. The Census of Construction Industries, conducted every five years, concentrates on the activities of industries that operate as general contractors, operative builders, special trades contractors, land dividers, and developers. On the other hand, another part of the Census Bureau's construction division concentrates on the collection and dissemination of building permit data.

The building permit data are collected monthly from all the permit-issuing places in the United States. They are then compiled by state, and the number of permits are published in Construction Reports C-40. More detailed data are distributed to depositories in each state. The Center for Business and Economic Research is designated as the Alabama depository.

The F. W. Dodge Division of McGraw-Hill Information Systems is a source for monthly construction contracts awarded by state. These data are proprietary and may not be reused without specific permission from the company.

The major source for housing data is the Census Bureau. Since 1940 that agency has been conducting a decennial census of housing in conjunction with the census of population. As a result, a great deal of data on housing for the state, standard metropolitan statistical areas, counties, places, and small areas have been made available through printed reports, census tapes, and microfiche.

MEANING OF SYMBOLS

The symbols in the tables have the following meanings:

–	Represents zero.
D	Withheld to avoid disclosing figures for individual companies; figures are included in higher level totals.
S	Withheld because estimates did not meet publication standard on the basis of either the response rate, associated standard error, or a consistency review.
NA	Not available; data were not collected.
Z	Standard error of estimate is greater than zero but less than 1 percent.
*	Sampling error is greater than 40 percent.
**	Sum of employees during pay periods including 12th of March, May, August, and November divided by 4
†	Represents total construction receipts less payments for construction work subcontracted to others.
††	Represents all business receipts less payments for construction work subcontracted to others, and payments for materials, components, supplies, and fuels. In SIC 1531 and 6552, land receipts are also subtracted from "all business receipts."
‡	Possible duplication in data.

4. EDUCATION

SECTION 4

EDUCATION

The Alabama Department of Education is the major source of education statistics in the state. Its Annual Report provides information on the county and city school systems under its jurisdiction. Included are such items as school enrollment by grades and race, attendance, transportation, teaching personnel, revenues and receipts, and payments. Limited data are published for vocational education and rehabilitation, higher education state institutions, and private schools.

Decennially the U.S. Bureau of the Census collects and publishes in the Census of Population selected information on school-age population, enrollment, and number of school years completed of persons 25 years old and over. These data are for the state, standard metropolitan statistical areas, counties, and cities with 2,500 or more population.

Other annual, biennial, and periodic survey statistics on education are provided by the National Center for Education Statistics (NCES) of the U.S. Department of Health, Education, and Welfare (HEW), U.S. Office of Education, and National Education Association (NEA).

5. EMPLOYMENT

SECTION 5

EMPLOYMENT

Employment data can be obtained from a great number of sources, but there are three principal sources for Alabama data: (1) the Alabama Department of Industrial Relations; (2) the U.S. Department of Labor, Bureau of Labor Statistics and Bureau of Employment Security; and (3) the U.S. Department of Commerce, Bureau of the Census.

The Alabama Department of Industrial Relations (ADIR) compiles and publishes current estimated employment and labor force statistics in numerous publications. Their Annual Report includes data on employment service activities, unemployment compensation, Federal programs, finance, and child labor. Many of these data are also available in other publications and special releases such as: Statistical Bulletin (monthly); Alabama Labor Market News (monthly); and Labor Market News for counties and employment office areas in Alabama (monthly, bimonthly, or periodic basis). Most of the tables in this Abstract are drawn from these sources or other ADIR publications.

The U.S. Department of Labor, Bureau of Labor Statistics (BLS), collects and publishes a wide variety of current statistics on employment and wages of the labor force. Two valuable monthly periodicals available through BLS are the Monthly Labor Review, which summarizes data on a national and regional basis, and Employment and Earnings, which contains data by states as well as the nation. Employment and Earnings Statistics for States and Areas is published annually by BLS to bring together current and historical data on employment, hours, and earnings of production workers in the states and metropolitan areas. Many of the more detailed data are published in special reports and bulletins.

The U.S. Department of Commerce, Bureau of the Census, makes available some of the most widely used statistics. The following list may be used as a guide to the more frequently used census sources.

Census of Population--Printed reports give detailed data for the state, counties, standard metropolitan statistical areas (SMSAs), urbanized areas, urban places with population of 10,000 or more, and census tracts. Data for smaller areas are available through the Alabama State Data Center, Center for Business and Economic Research. Included are data such as: employment status by sex, labor force status by age and sex, weeks worked, class of worker, occupation of unemployed by sex, industry of employed, place of work, means of transportation to work, income, and earnings of persons by selected occupation groups and sex.

Census of Retail Trade--Provides data every five years on employees and payroll for the state, counties, SMSAs, cities with 2,500 or more inhabitants, and cities with 500 or more establishments.

Census of Wholesale Trade--Offers quinquennial data on employees and payroll for the state, counties, SMSAs, cities with 200 or more establishments, and cities with 2,500 or more inhabitants.

EMPLOYMENT--CONTINUED

Census of Selected Services--Presents data for years ending in 2 and 7 on employees and payroll for the state, counties, SMSAs, cities with 200 or more establishments, and cities with 2,500 or more inhabitants.

Census of Manufactures--Contains data every five years on employees and production workers for the state, counties, SMSAs, and selected cities. The Annual Survey of Manufactures contains the same type data for intercensal years for the state and selected counties.

Census of Agriculture--Gives farm labor data for the state and counties at five year intervals.

County Business Patterns--Presents annual data on number of employees, taxable payrolls, and reporting units (by employment-size class) for the state and counties by standard industrial classification (SIC).

TABLE 5-1. ESTIMATED BASIC LABOR MARKET AND NONAGRICULTURAL WAGE AND SALARY EMPLOYMENT IN ALABAMA, 1970, 1977 - 1982
(In thousands)

Industry	Average monthly employment[1]						
	1970	1977	1978	1979	1980	1981	1982
Civilian labor force	1,353.0	1,568.0	1,629.0	1,664.0	1,675.0	1,669.0	1,713.0

NOTE: Civilian labor force, total employment, unemployment, and unemployment rates are by place of residence, whereas nonagricultural wage and salary employment is by place of work. Employment and unemployment estimates have been adjusted to Current Population Survey benchmarks. Data are final based on the preceding year's benchmark.

[p] Preliminary.

[1] Excludes proprietors, self-employed persons, workers in private households, and unpaid family workers. Includes all full and part-time nonagricultural wage and salary employees who worked during, or received pay for any part of, the pay period which includes the 12th of the month.

[2] Includes furniture and fixtures, professional instruments, and miscellaneous durable goods.

[3] Includes leather and leather products, tobacco manufactures, and products of petroleum and coal.

[4] Includes veterinary and other animal services, and landscape and horticultural services.

NOTE: County figures do not necessarily add to State totals, due to rounding and to inclusion of some units in "all other" county distributions to avoid disclosure of individual firm data. Industry totals include data for all units so classified.

* Average monthly employment in firms covered under the Unemployment Compensation Law, e.g., establishments employing one or more workers.
** Federal Government data excluded.
*** Data could not be allocated by county.
**** Included in "all other" to avoid disclosure of operations of individual reporting units.

NOTE: County figures do not necessarily add to State totals, due to rounding and to inclusion of some units in "all other" county distributions to avoid disclosure of individual firm data. Industry totals include data for all units so classified.

* Total wages paid to workers in firms covered under the Unemployment Compensation Law, e.g., establishments employing one or more workers.
** Federal Government data excluded.
*** Data could not be allocated by county.
**** Included in "all other" to avoid disclosure of operations of individual reporting units.

6. ENERGY

SECTION 6

ENERGY

This section presents statistics on the production and consumption of energy in Alabama. The principal sources involved are U.S. Department of Energy, Energy Information Administration; U.S. Department of the Interior, Bureau of the Mines; Edison Electric Institute; Alabama Department of Industrial Relations, Division of Safety and Inspection; and State Oil and Gas Board.

Although not included, the U.S. Bureau of the Census collects a substantial amount of energy-related data in its censuses and surveys that are not primarily focused on energy. Below are brief statements on the type of data in some of the Census Bureau's publications.

Census of Mineral Industries--Detailed information on coal mining and oil and gas operations.

Census of Manufactures and Annual Survey of Manufactures--Information on petroleum and related industries including cost of fuels purchased and consumption of fuels and electric energy by industry groups.

Census of Construction Industries--Data on the cost of fuels and electricity purchased by type of contractor are in the 1977 census.

Censuses of Retail Trade, Wholesale Trade and Selected Service Industries--General statistics, including sales or receipts, of firms involved in the distribution of fuels.

Current Industrial Reports--The Annual Survey of Oil and Gas provides data on the exploration and development, sales volume, revenue, and assets for crude petroleum and natural gas. Other monthly, quarterly, annual, and biennial reports present energy consumption information.

7. FOREIGN TRADE

SECTION 7

FOREIGN TRADE

The data presented here are for the Port of Mobile, the largest port in the Mobile Customs District. The District is composed of the following ports:

Florida
- Apalachicola
- Carrabelle
- Pensacola
- Port St. Joe

Mississippi
- Gulfport
- Pascagoula

Alabama
- Birmingham
- Huntsville
- Mobile

The Center for Business and Economic Research has monthly and annual import and export data by country and by commodity for each of the ports in the District and for the District as a whole.

These data are received from the Bureau of the Census in machine readable form. Shippers' declarations are submitted by exporters or their agents to the exporting carrier and by the carrier, in turn, to the U.S. Customs Service officers at U.S. ports. Customs officers at the ports transmit the documents to the Census Bureau on a flow basis. The source of information on merchandise imports is the formal entry form that importers are required to file with customs officials at the ports where the merchandise enters.

The statistics record the physical movement of merchandise from the United States to foreign countries, whether a commercial transaction is involved or not. They exclude shipments made by the federal government; monetary gold and issued coins; merchandise in transit between countries; fuel for use on departing vessels; and electrical energy. They do include, however, foreign aid commodities, military sales commodities, and agricultural assistance commodities.

The import and export data available to this Center include waterborne commerce only. Airborne commerce is not included.

Imports and exports through the Port of Mobile, or any other Alabama port, are not indicative of international commerce done by Alabama firms. Merchants from many states use the Port of Mobile as the exit port for their goods. These data also do not indicate how many Alabama firms are doing international business. There is no indication of firm name associated with these data, so one cannot tell which businesses are importers or exporters of goods.

TABLE 7-2. VALUE OF FOREIGN EXPORTS SHIPPED THROUGH THE PORT OF MOBILE FOR THE TEN LEADING COUNTRIES BY PRINCIPAL COMMODITIES, 1980

Leading countries	Principal commodities	Value (dollars)	
		All Shipments	Commodity
Japan		228,754,796	
	Soybeans, except roasted as coffee substitute		82,582,841
	Bituminous coal		56,996,976
	Wood pulp--sulfate		43,775,448
People's Republic of China		92,343,415	
	Soybeans, except roasted as coffee substitute		31,071,102
	Raw cotton, other than linters		28,290,260
	Corn or maize--unmilled		14,118,013
Belgium		76,374,487	
	Bituminous coal		22,059,716
	Wood pulp--sulfate		20,031,637
	Agricultural machinery for harvesting, etc.		12,350,380
West Germany		68,591,935	
	Rubber and rubber latex--synthetic		23,304,046
	Wood pulp--sulfate		19,203,595
	Lumber--hardwood		4,744,517
Italy		56,515,152	
	Soybeans, except roasted as coffee substitute		19,322,022
	Lumber--softwood		8,218,122
	Bituminous coal		7,481,704
Mexico		44,396,251	
	Soybeans, except roasted as coffee substitute		30,168,445
	Corn or maize--unmilled		8,074,121
	Bituminous coal		5,465,634
Netherlands		39,704,814	
	Soybeans, except roasted as coffee substitute		20,937,879
	Ores and concentrates, nonferrous metal		4,118,108
	Lumber--hardwood		1,797,907
Republic of China		38,533,633	
	Soybeans, except roasted as coffee substitute		36,142,906
	Bituminous coal		2,234,750
	Nuclear reactors and parts		62,954
Nigeria		36,425,672	
	Rice--milled		32,391,766
	Kraft paper, paperboard rolls, sheets		3,120,934
	Iron, steel plates, etc., coated		257,204
Algeria		36,373,214	
	Vegetables--leguminous, dried		35,886,820
	Anhydrous and aqua ammonia		227,829
	Lifting, loading or unloading machinery		148,371
Total exports		1,215,696,572

8. GROSS STATE PRODUCT

SECTION 8

ALABAMA GROSS STATE PRODUCT/ECONOMIC INDICATORS

Alabama Gross State Product (GSP), measuring the total value of goods and services produced in Alabama, is a primary indicator of the economic health of the state. Analysis of the various components of GSP can assist policy and decision makers from both the public and private sectors in evaluating past economic performance and future opportunity.

The annual Alabama Econometric Model (AEM), used to generate the forecasts, consists of more than one hundred mathematical equations. The model predicts future economic conditions using historical data for the state and the nation, forecasted levels of national economic activity, and selected state policy variables. Forecasts of national activity are provided by Wharton Econometric Forecasting Associates. Alabama Econometric Model forecasts for GSP and its components are subject to change as more current or revised historical data become available and expectations for the national economy change.

Definitions of selected terms used in the accompanying tables are:

Current dollars--Ordinary dollars exchanged in daily commerce, not adjusted for the effects of inflation. These are also referred to as "nominal" dollars.

Constant dollars--"Real" dollars expressed in constant value, adjusted for the effects of inflation. All AEM constant figures are in 1972 dollars.

Disposable income--Total personal income less state and federal income tax. It is the total income available to individuals to dispose of as they choose and is a measure of the overall buying power of consumers.

9. INCOME & PRICES

SECTION 9

INCOME AND PRICES

Income data for the state come almost exclusively from two bureaus, the Bureau of Economic Analysis and the Bureau of the Census, within the U.S. Department of Commerce. Prices paid for goods and services, both consumer and producer (formerly wholesale), are collected and made available by the Bureau of Labor Statistics (BLS), U.S. Department of Labor. Additional price data, such as prices received and paid to farmers, are provided by the U.S. Department of Agriculture and its state affiliates.

The primary source for personal and per capita personal income is the Bureau of Economic Analysis (BEA). These data are available for the U.S., state, standard metropolitan statistical areas (SMSA), and counties from the Survey of Current Business and computer tape, microfiche, or printouts from the Center for Business and Economic Research (CBER), The University of Alabama.

Prices and price indexes, consumer and producer, generated by the Bureau of Labor Statistics are the most comprehensive measures of price changes available. Consumer price indexes are available monthly for two series, all urban consumers and urban wage earners and clerical workers, for the United States average and selected major cities; whereas the producer prices, broken down by commodities, are available only for the nation as a whole. Since individual state data are not available the U.S. average is normally used and, therefore, published in this section.

In order to help the user of the personal income data in this section, a list of definitions are presented below:

Definition of terms:

State personal income--The current income received by residents of the states from all sources, inclusive of transfers from government and business but exclusive of transfers among persons. It is measured before deduction of income and other direct personal taxes, but after deduction of personal contributions to social security, government retirement, and other social insurance programs. While cash income makes up the overwhelming bulk of the total, personal income also includes several types of nonmonetary income (income in kind, including tips and bonuses as well as contractual compensation).

Disposable personal income--The income remaining to persons after payment of personal taxes. It is the concept closest to what is commonly known as "take-home pay" (i.e., the amount which individuals can use to make personal outlays or to save).

Per capita income--Derived by dividing total personal income by total population.

Wage and salary disbursements--Consist of the monetary renumeration of employees commonly regarded as wages and salaries, inclusive of executives' compensation, commissions, tips, bonuses, and the value of payments in kind which represent income to the recipient. They are measured before deductions for social security contributions, union dues, or other purposes.

Other labor income--Consists of supplementary types of labor income paid out or accruing in the current period, such as employer contributions to pensions and welfare under privately administered worker's compensation insurance and director's fees.

Proprietors' income:

Farm proprietors' income--Derived from the gross income of farmers minus their total expenses of production.

Nonfarm proprietors' income--Comprised of income of unincorporated enterprises and inventory valuation adjustment.

Dividends, interest, and rent:

Dividends--Cash payments by corporations organized for profit to U.S. resident stockholders.

Interest--Monetary and inputed interest income of persons from all sources.

Rent--Monetary and inputed income of persons from the rental of real property except those primarily engaged in the real estate business.

Transfer payments--Consist of disbursements to persons for which no services are currently rendered, such as unemployment benefits, social security payments, veterans benefits, welfare and relief payments, food stamps, black lung, consumer bad debts, gifts to nonprofit institutions, and other such payments.

Personal contributions for social insurance--Contributions made by individuals under the various social insurance programs. (Payments by both employees and self-employed are included.)

Residence adjustment--Factor used to adjust wage and salary disbursements, other labor income, and personal contributions for social insurance from place of work to place of residence.

TABLE 9-6. PERSONAL INCOME BY MAJOR SOURCES 1976-1981
(THOUSANDS OF DOLLARS)

(D) NOT SHOWN TO AVOID DISCLOSURE OF CONFIDENTIAL INFORMATION. DATA ARE INCLUDED IN TOTALS.

(L) LESS THAN $50,000. DATA ARE INCLUDED IN TOTALS.

2/ ESTIMATES BASED ON 1972 SIC.

3/ TOTAL PERSONAL INCOME LESS FARM EARNINGS (LABOR AND PROPRIETORS' INCOME) EQUALS NONFARM PERSONAL INCOME.

4/ CONSISTS OF WAGE AND SALARY DISBURSEMENTS, OTHER LABOR INCOME, AND PROPRIETORS' INCOME. WAGES AND SALARIES BASED UPON DATA FURNISHED BY INDIVIDUAL STATE BUREAUS OF EMPLOYMENT SECURITY.

5/ ADJUSTMENT FOR BORDER WORKERS: INCOME OF U.S. RESIDENTS WORKING ACROSS U.S. BORDERS LESS INCOME OF FOREIGN RESIDENTS WORKING IN THE U.S.

6/ INCLUDES THE CAPITAL CONSUMPTION ADJUSTMENT FOR RENTAL INCOME OF PERSONS.

7/ INCLUDES THE CAPITAL CONSUMPTION ADJUSTMENT FOR NON-FARM PROPRIETORS.

8/ INCLUDES WAGES AND SALARIES OF U.S. RESIDENTS WORKING FOR INTERNATIONAL ORGANIZATIONS IN THE U.S.

9/ THE ESTIMATES FOR FEDERAL MILITARY EARNINGS HAVE BEEN REVISED FOR THE YEARS 1977-81.

10/ THE REVISED ESTIMATES FOR THIS AREA ARE SUFFICIENTLY DIFFERENT FROM THE ESTIMATES FOR EARLIER YEARS THAT A DISCONTINUITY IN THE TIME SERIES BETWEEN 1976 AND 1977 EXISTS FOR TOTAL AND PER CAPITA PERSONAL INCOME.

10. MANUFACTURING

SECTION 10

MANUFACTURING

The Bureau of the Census gathers, compiles, and publishes information on manufacturing activity in three principal ways: Census of Manufactures, taken every five years (years ending in 2 and 7); Annual Survey of Manufactures, for intercensal years; and Current Industrial Reports, a series of annual, quarterly, and monthly surveys.

The principal data collected in the Census of Manufactures cover employment, payrolls, and worker-hours; inventories; capital expenditures; the cost of materials; resales, fuels, electricity, and contract work; ownership and control; and products shipped. In selected industries supplemental information is also obtained on characteristics of the plant, such as the type of operation, processing of metals, and types of equipment used.

The Annual Survey of Manufactures carries forward the key measures of manufacturing activity that are covered in more detail every five years in the census and provides annual national estimates of the value of product shipments. The ASM also collects details not requested of all manufacturing establishments even in census years, such as the type of fuel and energy consumed, assets, rents, and supplements to payroll.

The Current Industrial Reports provide current statistics on detailed commodities, such as confectionery, inorganic materials and related acids, or major household appliances. These kinds of commodities are otherwise covered only at much broader product class levels in the ASM. The statistics are usually reported at the national level; state level detail is rare.

[1] In annual survey of manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. III, table 1 of State chapter.

[2] Including central administrative offices and auxiliaries (for definition, see appendix B).

[3] Aggregate of cost of materials and value of shipments for industry groups (2- and 3-digit) and for all manufacturing industries includes extensive duplication, since products of some industries are used as materials by others (see appendix B).

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1] Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2] Including central administrative offices and auxiliaries (for definition, see appendix B).

[3] Aggregate of cost of materials and value of shipments for industry groups (2- and 3-digit) and for all manufacturing industries includes extensive duplication, since products of some industries are used as materials by others (see appendix B).

-	**Administrative and auxiliary**	-	**79**	**43**	**5.4**	**83.9**	-	-	-	-	-	-	-		**(NA)**	**(NA)**

Note: "All industries" level includes data on number of establishments, total employment, and total payroll for central administrative offices and auxiliaries (for definition, see appendix B).
- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1] Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those industry groups and industries where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2] Statistics for some industry groups and industries are withheld to avoid disclosing figures for individual companies. However, for such industry groups and industries with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees; EE—1,000 to 2,499 employees; FF—2,500 employees or more. Statistics for industry groups shown include data for all component industries, regardless of whether data are shown for individual industries in the group.

[3] Aggregate of cost of materials and value of shipments for industry groups (2- and 3-digit) and for all manufacturing industries includes extensive duplication, since products of some industries are used as materials by others (see appendix B).

Note: "All industries" level includes data on number of establishments, total employment, and total payroll for central administrative offices and auxiliaries (for definition, see appendix B).
- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. (S) Withheld because estimate did not meet publication standards.
(Z) Less than 50 thousand dollars or hours; under 50 employees.

[1] Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2] Aggregate of cost of materials and value of shipments for industry groups (2- and 3-digit) and for all manufacturing industries includes extensive duplication, since products of some industries are used as materials by others (see appendix B).

Note: "County" level includes data on number of establishments, total employment, and total payroll for central administrative offices and auxiliaries (for definition, see appendix B).

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1] Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2] Aggregate of cost of materials and value of shipments for industry groups (2- and 3-digit) and for all manufacturing industries includes extensive duplication, since products of some industries are used as materials by others (see appendix B).

Note: "City" level includes data on number of establishments, total employment, and total payroll for central administrative offices and auxiliaries (for definition, see appendix B).

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1] Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those industry groups and industries where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2] Aggregate of cost of materials and value of shipments for industry groups (2- and 3-digit) and for all manufacturing industries includes extensive duplication, since products of some industries are used as materials by others (see appendix B).

11. POPULATION

SECTION 11

POPULATION

The Bureau of the Census, U.S. Department of Commerce, is the most comprehensive basic source for population data. It is a general-purpose statistical agency whose primary function is to collect, process, compile, and disseminate statistical data for use by all persons or agencies. Most of the data in this section was derived from or based on census figures.

Since 1790 the Census Bureau has taken decennial censuses, attempting to make a complete count of all persons by their place of residence. General characteristics, such as number of persons by age, race, sex, household relationship, etc., are provided on a 100 percent basis; whereas, the social and economic characteristics (education, employment, income, etc.) are made available from representative samples of the population.

Three sets of population projections are included herein. The reader should be aware that the three sets differ in source, time frame, assumptions, and results. Table 11-6 presents a consistent set of projections for all states and regions of the United States to the year 2000. These Bureau of the Census data are included to assist those needing to compare state and regional population projections. Table 11-7 presents the official planning projections for Alabama counties to the year 2000 which are promulgated by the Alabama Department of Economic and Community Affairs, while Table 11-8 presents annual estimates and projections of the state population by age and gender to the year 1990. Comparison of the state total for 1990 from each of these tables will indicate differences which the user needs to keep in mind.

12. TRADE

SECTION 12

TRADE

Trade is defined herein as those establishments whose primary activity is the sale of goods or services to the consumer or those which supply goods to selling establishments. These establishments are divided into retail, wholesale, and service categories.

The economic censuses, conducted by the U.S. Department of Commerce, Bureau of the Census, in years ending in 2 and 7 is a primary source for such information as number of establishments, sales voulme, and employment for the trade categories. In some cases it is virtually the only source of this information, particularly at the county level. In addition to retail trade, wholesale trade, and selected services, these censuses cover construction industries, manufacturing, mining, and selected transportation.

Changes in the kind-of-business definitions between 1967 and 1972 limit the comparability of retail and wholesale economic censuses. The designation of electrical supply stores; plumbing and heating equipment dealers; farm equipment dealers; hay, grain, and feed stores; and other farm supply stores was changed from retailers to wholesalers. Changes affecting comparability among the censuses are footnoted in tables 12-7 and 12-13.

In addition to the economic censuses, the Center for Business and Economic Research (CBER) measures retail activity within the state. Enough differences exist between the censuses of retail trade and CBER's retail trade series to limit their comparablity.

Comments on the retail, wholesale, and service sectors follow:

RETAIL TRADE

Retail trade data in this section are from two sources: (1) the Center for Business and Economic Research (CBER) and (2) the U.S. Department of Commerce, Bureau of the Census, censuses of retail trade (most recent available is for year 1977.)

The reports by CBER are based on sales data supplied by the Sales Tax Division, Alabama Department of Revenue. The sales data shown, however, are neither taxable sales nor total sales. Instead, they are "net sales at retail," computed from the following formula: (Gross sales) - (Wholesale sales) - (Interstate sales) = Net retail sales. The sales in this Abstract are not comparable with those published in prior editions due to the disaggregation of many chain store sales that were heretofore reported in, and therefore credited to, the county where the home office was located. Data earlier than 1977 are not available for this new series. The CBER publication Alabama Business carries monthly sales data for the state, SMSAs, and counties.

Since these data are secured for the use of a state government agency whose interests differ substantially from those of the economic resarcher, certain deficiencies exist in the data from the business analyst's point of view. In any event, a researcher who plans extensive use of these statistics for a purpose requiring a high degree of accuracy should contact CBER before undertaking such an analysis. Note also that these data differ from Census Bureau retail trade data in part because of different classifications of firms and in part because of a difference in definition of retail sales.

Retail concerns, as defined by the Alabama Department of Revenue, are those "establishments open to the general public primarily engaged (at least 50 percent of its sales) in selling merchandise for personal or household consumption or utilization, and rendering service incidental to the sale of goods."

All concerns which do not meet the "retail" requirements but do have some retail sales are placed in a "nonretail" classification. This classification is comprised of unclassified concerns, those which have not yet been classified or which do not fit into any classification; wholesale concerns which also make some sales at retail; service concerns, such as personal services, business services, automotive services, and like groups; and manufacturers who also sell to the public. Only sales made "at retail" by nonretail concerns are included in the sales tabulations.

The more important types of firms found in each category of the CBER retail trade series are summarized below.

Retail Concerns

Food--Grocery stores; dairy products stores; milk dealers; fish markets; meat markets; candy, nut, confectionery stores; delicatessens; fruit stores and vegetable markets; bakeries and caterers; egg and poultry markets; and other food stores.

General stores with food and gas

General merchandise--Department stores; dry goods stores; general merchandise stores with food; other general merchandise stores; and variety stores.

RETAIL TRADE--CONTINUED

Apparel--Men's-boys' clothing and furnishing stores; family clothing stores; women's ready-to-wear stores; furriers and fur shops; women's accessory stores; infants' wear shops; custom tailors; shoe stores; and other apparel stores.

Furniture, furnishings, and appliances--Furniture stores; floor covering stores; drapery, curtain, and upholstery stores; china, glassware, and metalware stores; interior decorators; antique shops; household appliance dealers; radio stores; radio-musical instrument stores; and other home-furnishings stores.

Automotive--Motor-vehicle dealers (new or used); accessory, tire, battery dealers; motorcycle dealers; aircraft dealers; and motorboat and yacht dealers.

Gasoline service stations

Lumber and building materials--Lumber yards; building materials dealers; heating-plumbing equipment dealers; paint, glass, and wallpaper stores; and electrical supply stores.

Hardware and farm implements--Hardware stores; farm implement-tractor dealers.

Eating places--Restaurants, cafeterias, lunchrooms; lunch counters and stands; and soft drink, juice, and ice-cream stands.

Drug stores

All other retail concerns--Drinking places; liquor package stores; ice dealers; fuel oil retailers; hay, grain and feedstores; farm and garden supply stores; jewelry stores; book stores; fish tackle and bait shops; stationery stores; cigar stores and cigar stands; florists; gift, novelty, and souvenir shops; news dealers; office and store appliances; school supply; opticians; photographic supply and camera stores; sporting goods stores; bicycle stores; luggage stores; piano and musical instrument stores; scientific and medical instrument and supply dealers; second-hand stores; office supplies and business machines; and industrial equipment and supplies.

Nonretail and Unclassified Concerns:

Wholesale concerns

Service establishments--Personal services; business services; services allied to transportation; automotive repairs and services; other repair services; custom industries; and miscellaneous services.

Manufacturing

Unclassified and other concerns--Hotels and motels; schools; professionals; transportation; and others.

To compare these categories with those of the 1977 Census of Retail Trade, see table 12-2.

WHOLESALE TRADE

Wholesale trade is defined in the Standard Industrial Classification Manual 1972 as "establishments or places of business primarily engaged in selling merchandise to retailers; to industrial, commercial, institutional, farm, or professional business users; or to other wholesalers; or acting as agents or brokers in buying merchandise for or selling merchandise to such persons or companies."

The most complete source of wholesale trade data is the quinquennial census of wholesale trade. Data from the Alabama portion of the area statistics of the 1977 Census of Wholesale Trade, the most recent available, are presented in this section.

SELECTED SERVICE INDUSTRIES

The Standard Industrial Classification Manual 1972 defines service establishments as those "primarily engaged in providing a wide variety of services for individuals, business and government establishments, and other organizations." Specialized services which are closely allied to specific divisions are classified in their respective divisions. Aerial crop dusting, for example, is classified under the agriculture, forestry, and fishing division.

The 1977 Census of Service Industries follows the SEC definition except that religious organizations (churches, religious schools), private household services (babysetting, domestic services), and governmental organizations are classified in the covered industries. Passenger transport arrangement services (travel agencies, ticket offices) in the transportation and public utilities division is included in the service industries census, however.

As in the censuses of retail and wholesale trade, the comparability of the 1967 and 1972 censuses of service industries is limited because of a revision in the kind-of-business classifications. Computer and data processing services, not included in 1967, were added to 1972. These changes are footnoted in Table 12-17.

SECTION 13

TRANSPORTATION

The U.S. Department of Commerce, Bureau of the Census, provides a variety of information regarding the field of transportation. Items such as means of transportation and commuting time to work, and place of work destinations result from the decennial censuses of population and housing. More directly, the Census Bureau conducts a census of transportation quinquennially in years ending in 2 and 7. This census is a part of the larger economic census and concerns itself with economic issues, particularly information on the trucking industry.

Information regarding registrations of automobiles and other vehicles and the sale of gasoline is complied by the Alabama Department of Revenue or R. L. Polk and Company.

The U.S. Army Corps of Engineers is the primary source of data regarding transportation for Alabama rivers and the Port of Mobile. A brief explanation of some of the terms encountered in the waterborne transportation tables follows:

Imports and exports--These terms apply to traffic between the United States and foreign ports, including the Canal Zone.

Coastwise receipts and shipments--These terms apply to domestic traffic receiving a carriage over the ocean or the Gulf of Mexico.

Internal receipts and shipments--These terms apply to traffic between ports or landings, wherein the entire movement takes place over inland waterways.

Intraport receipts and shipments--Traffic between the several arms or channels of a port.

Local--Movements of freight within the confines of a single arm or channel of a port or within the limits of a port having one project arm or channel (except car ferry, general ferry, and cargoes in transit) are termed "local" The term is also applied to marine products, sand, and gravel taken directly from beds of the oceans, the Gulf of Mexico, and important arms thereof.

Upbound and downbound--These terms are applied to movements within the confines of a river, intracoastal waterway or canal.

Inbound and outbound--Traffic moving from one waterway into another is termed "outbound" in the case of the shipping and "inbound" with respect to the receiving waterway.

Through traffic--Since waterways bearing tonnages neither loaded nor discharged at points thereon are entitled to that traffic, such movements are termed "through traffic."

Passengers--These figures include all passengers arriving and departing by water on the various waterways and channels and at the ports. They are not classified as domestic or foreign travelers.

Ton-miles--The figures on ton-miles reflect only the distance each ton of cargo, foreign or domestic, moved on the waterway described in the section for which the figure is reported.

Domestic traffic--The domestic traffic includes all commercial movements between points in the continental United States, between the continental United States and a territory or possession, among the territories and possessions, and between points in each territory or possession.

NOTE: DATA RELATE TO STATE OF REGISTRATION, WHICH IN MOST CASES IS BASE OF OPERATION; HOWEVER, SOME TRUCKS REGISTERED IN A GIVEN STATE ARE ACTUALLY BASED IN ANOTHER STATE BECAUSE THEY OPERATE INTERSTATE OR THEIR OPERATORS HAVE MOVED TO ANOTHER STATE. DETAILED FIGURES MAY NOT ADD TO TOTALS BECAUSE OF ROUNDING. STANDARD ERROR IS AN ACTUAL NUMBER.

- ESTIMATE IS LESS THAN 50 TRUCKS.

[1] WHEN NO RESPONSE WAS OBTAINED FOR ANNUAL MILES, DATA WERE IMPUTED.
[2] DETAIL DOES NOT ADD TO TOTALS BECAUSE ITEMS WERE NOT APPLICABLE OR MULTIPLE RESPONSES WERE POSSIBLE.
[3] WHEN NO RESPONSE WAS OBTAINED, ONE TRUCK WAS IMPUTED BASED ON BODY TYPE OF SAMPLED VEHICLE.
[4] BECAUSE SOME "LIGHT" TRUCK RESPONDENTS WERE UNFAMILIAR WITH BRAKING SYSTEM TERMINOLOGY, A LARGE PROPORTION OF DATA FOR "OTHER" SHOULD BE FOR "HYDRAULIC" (E.G., DATA ON POWER ASSISTED BRAKES, DISC BRAKES, VACUUM-HYDRAULIC, ETC.).
[5] DATA RELATE ONLY TO SPECIFIED EQUIPMENT ON WHICH MAINTENANCE WAS PERFORMED.
[6] PICKUPS, PANELS, VANS, AND MULTISTOPS ARE NOT INCLUDED.

SOURCE: Same as Table 13-3.

14. VITAL STATISTICS

SECTION 14

VITAL STATISTICS

The Alabama Department of Public Health, Bureau of Vital Statistics, is the principal collector and supplier of vital statistics data for Alabama. This agency maintains and publishes detailed natality and mortality data by county and selected places as well as summary county data for marriages and divorces. Publications presenting these data are Alabama's Vital Events (annually) and Alabama Vital Statistics Quarterly Report.

Vital statistics are compiled for the country as a whole by the National Center for Health Statistics (NCHS) and published annually in Vital Statistics of the United States and monthly in Monthly Vital Statistics Report.

Each of these references contains registrations of the events for place of occurrence data as well as place of residence data.

TABLE 14-1. ALABAMA VITAL EVENTS FOR 1971, 1980 AND 1981

Vital event	1981	1980	1971	Percent change 1971-1981
Live births	61,497	63,405	66,750	- 7.9
(Rate per 1,000 population)	15.6	16.3	19.1	-18.3
Illegitimate births	13,848	14,033	10,498	+31.9
(Ratio per 1,000 live births)	225.2	221.3	157.3	+43.2
Deaths	35,348	35,305	33,807	+ 4.6
(Rate per 1,000 population)	9.0	9.0	9.6	- 6.3
Fetal deaths	754	723	1,073	-29.7
(Ratio per 1,000 live births)	12.3	11.4	16.1	-23.6
Infant deaths	796	960	1,566	-49.2
(Rate per 1,000 live births)	12.9	15.1	23.5	-45.1
Neonatal deaths	512	623	1,113	-54.0
(Rate per 1,000 live births)	8.3	9.8	16.7	-50.3
Maternal deaths	7	8	30	-76.7
(Rate per 10,000 live births)	1.1	1.3	4.5	-75.6
Marriages	48,710	49,018	48,276	+ 0.9
(Rate per 1,000 population)	12.3	12.6	13.8	-10.9
Divorces	26,791	26,745	16,905	+58.5
(Rate per 1,000 population)	6.8	6.9	4.8	+41.7
Mortality rate for specific causes: (Rate per 100,000 population)				
Diseases of the heart	304.4	302.6	329.2	- 7.5
Malignant neoplasms	182.6	180.0	151.8	+20.3
Cerebrovascular diseases	87.7	88.8	132.7	-33.9
Accidents	54.7	58.8	75.1	-27.2
Motor vehicle accidents	28.0	27.7	40.2	-30.3
Influenza and pneumonia	18.6	19.4	25.3	-26.5
Diseases of the arteries	18.8	18.6	24.6	-23.6
Diabetes mellitus	16.0	17.0	18.8	-14.9

NOTE: Rates for 1979 revised using 1980 Census data.
